# OUR SHADE STORY

Inspired by a Need for Cool,  
Comfortable Outdoor Spaces

Tara, our CEO, loves spending time by the pool with her grandkids. But keeping a clean, inviting backyard in Alabama's heat was a challenge. After cutting down trees to stop falling debris, she found herself without shade. The space became too hot to enjoy.

Looking for a better solution, Tara discovered shade sails. Lightweight and breathable, these shades enhance airflow and lower temperatures. They offer a cool, comfortable environment without the bulk of solid structures.

Unlike flimsy options found online, Tara's shades are built for durability and performance. They can be configured to cover a variety of spaces, adding both style and function. Tara found an easy-to-install, long-lasting solution to protect her family from the sun. Inspired by her experience, she set out to share these benefits with other families through Tara's expertly crafted shade solutions.
